How to care for your flag.

- 1 Life expectancy is entirely dependent on the climatic conditions and hours of flying. Realistic maximum lifespan of a flag used regularly is approximately six months. If any edges of the flag become frayed then trim, reinforce and re-hem to extend its life.
- 2 Flags can be washed in a regular washing machine on a 30°C wash with everyday detergents. Always allow your flag to completely dry out before storing.
- 3 Consider where you position your flag as air pollution will cause the white areas to become grey and UV can, over time, cause deterioration and fading to the fabric.
- 4 Dismantle your flag during adverse weather conditions, including strong winds. Heavy rain combined with high winds can increase the weight of the flag and put extra strain onto the pole.
- 5 Ensure that your flag doesn't catch or snag on its pole or any other surrounding objects. Do not place poles too close together.

* Suitable for use with all versions.

** Suitable for use with 2.8m and 3.4m versions.

*** Suitable for use with 2.8m and 3.4m versions, or if pegged down can be used with all versions.

Understanding printed media

Printing and finishing outdoor products

Specialist printing and finishing skills are required on most outdoor products, especially flags.

We offer a wide range of printing, cutting and finishing techniques to include UV, Dye-sub and latex printing plus digital cutters and expert sewing machinists to give a top-class professional finish.

Whether it's one flag or 100 outdoor banners - no job is too small or too big and turnaround is very fast with quick and reliable delivery.

If you are able to plan ahead you can make impressive savings on the cost of your printing, ask your local dealer for details.

Finishing

There is a wide range of printed media available to suit different applications. Here are some explanations of the more popular types of media. See below, or ask your dealer for more information.

- Economy Banner PVC: Ideal for short-term, frequently-changing presentations and outdoor banners
- Standard Banner Polyester/Hybrid: A durable substrate that retains its shape, ideal for mobile presentations and also for more permanent displays, 80% stop-light
- Premium Banner Polyester: High-white giving excellent colour definition. Ideal for semi-permanent displays where a premium finish is required, 90% stop-light
- Pop-Up PVC: PVC 550 micron, UV-cure printed, suitable for indoor use
- Standard Flag Knit: 115g Polyester, textile fabric dye- sublimation printed, suitable for outdoor and indoor use
- Flag mesh: 110gm textile fabric, ideal for outdoor flags
- Display Polyester: 210g textile fabric, dye-sublimation printed, suitable for outdoor and indoor use.
