Dear Sirs

Re: ACT Reprographics Ltd

We were introduced to ACT by Stoke CBC who recommended them as a supplier of modular display systems and graphics for an exhibition in London we had coming up.

We contacted ACT just four weeks before the show and they quickly designed and produced a 3D visual for us to approve along with a costing for both portable and modular display items.

We supplied them with artwork and sat back as they took care of everything, graphics, electric's, flooring, carpet, installation etc. We just turned up on the day and everything was ready.

We would not hesitate to use them again and have recommended them to all that have asked.
