

Re-board®

- The Ultimate Board

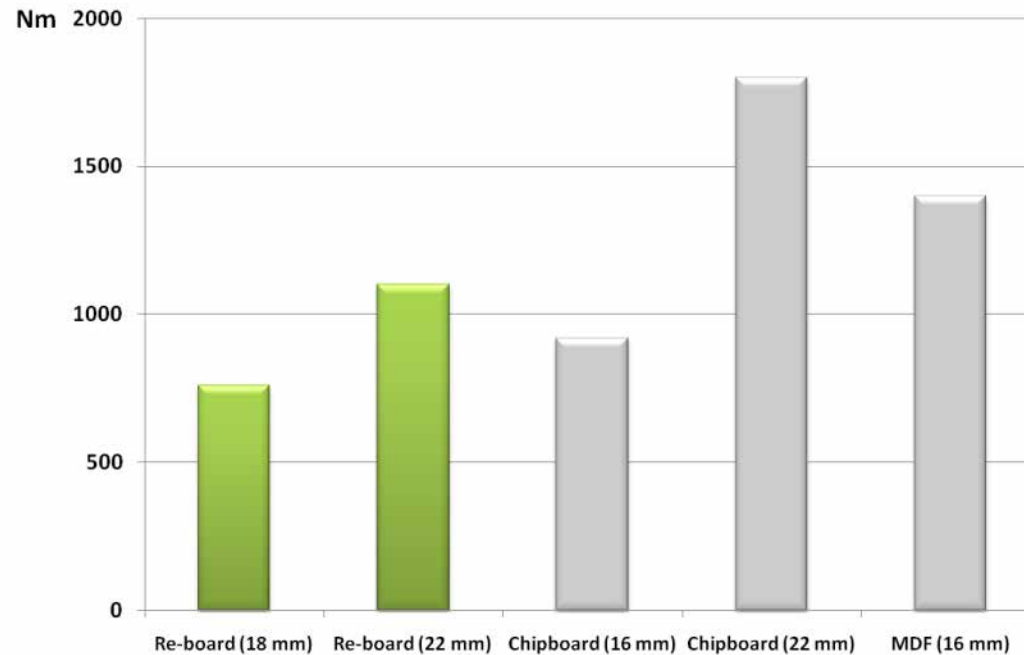

The Product

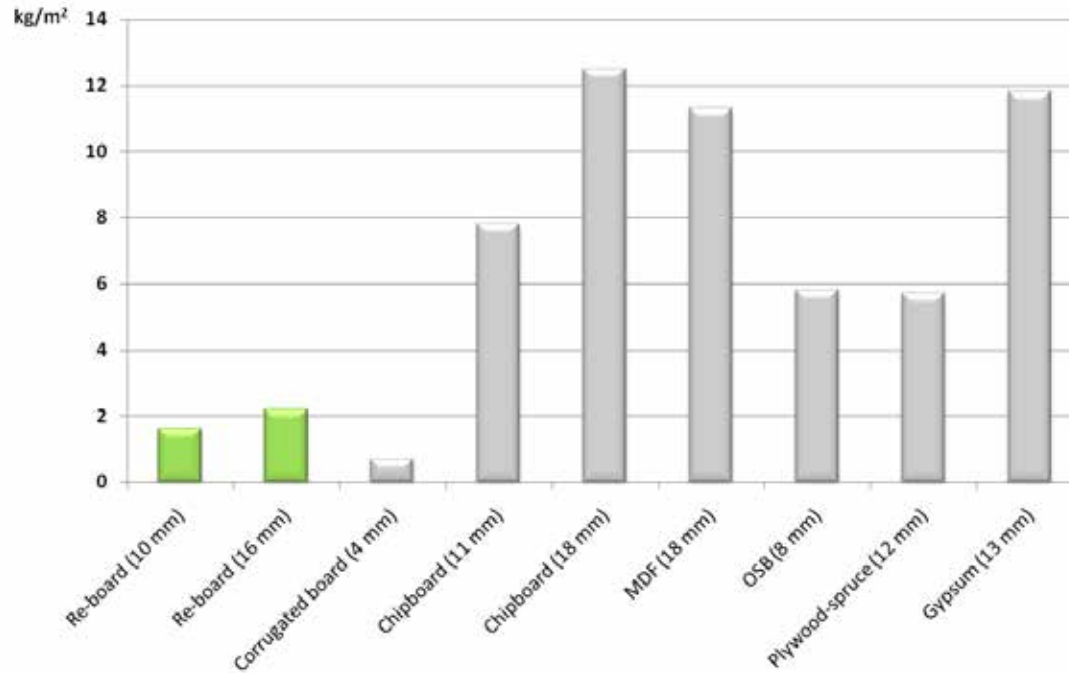

Re-board® is a lightweight paper-based sandwich board, with a unique structure of corrugated board cells with several layers of special liners

Exceptional Strength...

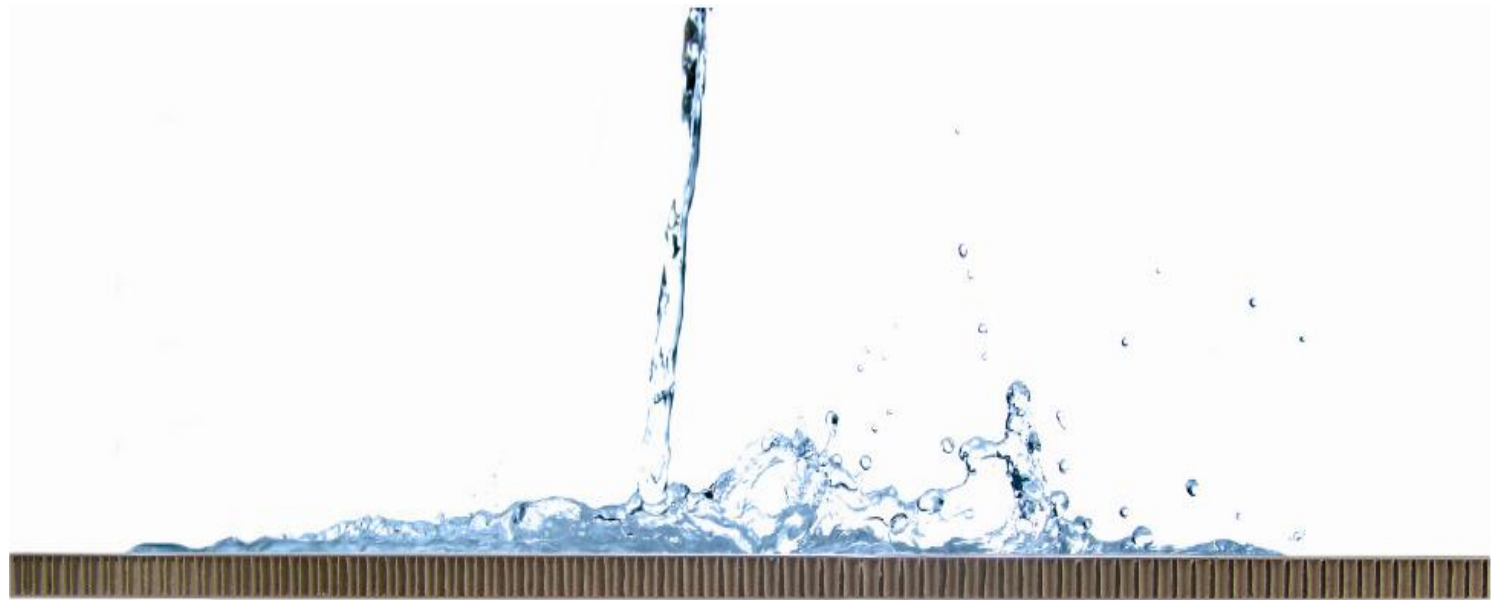

...combined with Low Weight

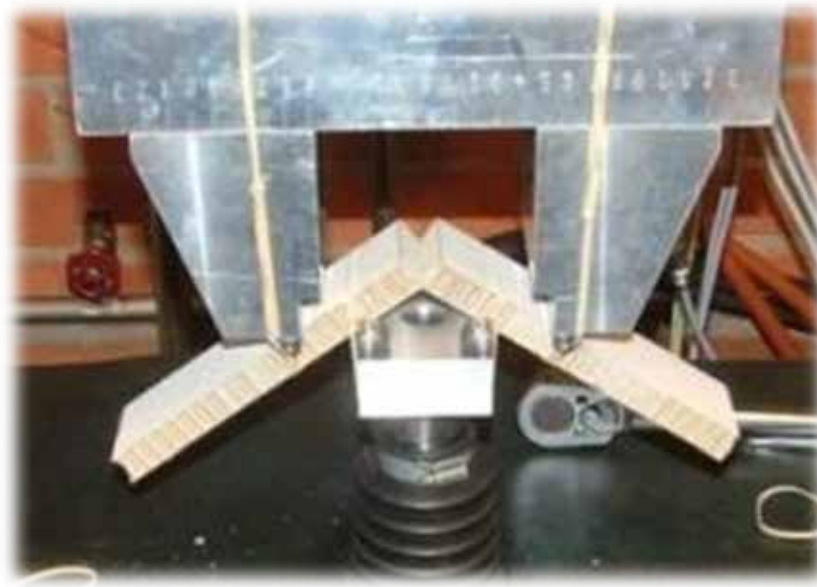

Re-board® is Water Resistant

A thin plastic layer keeps the core dry and the physical properties unchanged in humid conditions

Re-board® is Durable

- Does not break under excessive pressure
- Bends in a predictable way
- The liner can withstand thousands of repetitive bendings

Re-board® Can Form Curved Shapes

With the right tools and know-how, almost any shape can be created with Re-board®

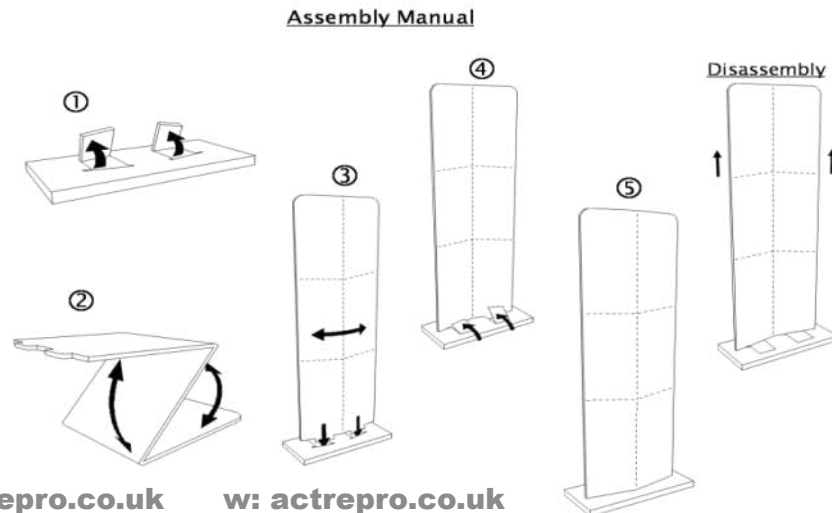

Re-board® is Environmentally Friendly

- Can be recycled like regular paper
- No harmful products are used in the manufacturing process
- Decreases the use of raw material with 80% compared with solid boards such as chipboards
- Energy efficient production – CO₂ emissions cradle to gate for 16 mm Re-board® is only **2 kg/m²**
- Low weight decreases CO₂ emissions from transportation

Key Benefits for End Customers

- Marketing communication and flexibility
 - Innovative structures
 - Dual purpose – goods and message bearer
 - Volume flexibility – each product can be unique
- Right amount, time and place
 - No waste, no storage, no loading/unloading
- User friendliness
 - Light material – low physical strength required
 - Easy to set up – store employees can do the assembly

Accessories

- A wide range of accessories facilitates the design of creative Re-board® constructions
- The full range is presented in the Re-board® Accessories Catalogue
