

ANTIMICROBIAL FILM CERTIFIED AGAINST COVID-19

Innovative and revolutionary, **Coala Coversafe™** is a self-adhesive transparent film that eliminates up to 99.9% of viruses (including coronavirus), bacteria, yeast and mould on surfaces.

Coala Coversafe™ is manufactured by Gergonne and contains a patented technology developed by Pylote with mineral ceramic microspheres that act as a barrier to viruses and microbial activity.

Suitable for a range of applications including light switches, door handles, handrails, desks, tables and counters, this revolutionary film allows for enhanced safety in public areas, workplaces and educational facilities.

- + **PVC-free, natural and safe for the skin**
- + **Permanent and stable protection over time (tested for over 4 years)**
- + **Easy installation with rapid action, removable without residue**
- + **Discreet once applied (thin, transparent, matt)**
- + **Can be cleaned with any common cleaning product without any kind of degradation of its antimicrobial activity**

APPLICATIONS

- The **Coala Coversafe™** adhesive film is intended for all sectors: retail stores, companies, nurseries, schools, administration, hospitals, retirement homes, clean rooms for the medical industry and others.
- It can be applied, among others, on tables (meeting, catering, offices), counters/cash counters, door handles, switches, bannisters, handrails automatic terminals and payment terminals.
- We all have the same objective: make the environment around us safer against risks of microbial contamination.
- Thanks to **Coala Coversafe™**, it is now possible to drastically reduce the tactile transmission of viruses and bacteria in public areas.

EXAMPLES

Meeting rooms

Break rooms and dining halls

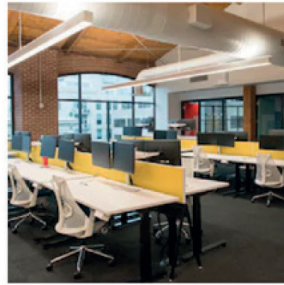

Door handles, switches etc.

Restaurants

Bars

Open and shared office spaces

Automatic dispensers (drinks, money..) and coffee machines
